President Bossiter says that in addition to their being more convenient for the public the new plans will save the companies \$150.000 in the cost of making the necessary changes in the Bridge structure, and as much more in the saving on operating expenses in the first year. Adother admirable feature about the simplicity of the new plans is that cars can be running over the Bridge by December, a month before it would be possible under the old plans. "My associates believe," said he "that sentence should be suspension in this case as well as in the previous one, believing that the real person behind the defendant, his employer should be punished. My opplion, however, is that the principal can only be punished in these cases by punishing the agent."

Then Justice Hayes explained more fully the position of Justice Jacob and himself. "We have always sustained the Health Department," said he. There must be evidence of an intent to do wrong, and the Health Department has the power and facilities to find such evidence. It can follow these men until the Impure milk is offered for saic, and then areest the offender. When the proper evidence is brought here we shall be ready to Impuse heavy penalties on the wrongdoers."

ACTIVITY OF BUYERS.

BIG INCREASE IN SALES DUE TO THE MERCHANTS ASSOCIATION.

Association must undoubtedly be attributed the credit for a large share of the extensive volume of business that is just now being transacted by the merchants and producers of this city. The many hundreds of buyers who have been induced to visit the metropolis because of the reduced cost of trensit obtained by the Merchants' Association have increased the buying for the fall business several hundred per cent more than has been done for several years past. In the drygoods district alone there are many signs of prosperity. The large houses in the drygoods trade actually find difficulty in filling their orders, and, despite the activ-

culty filling their orders, and, despite the activity displayed by the employes, it is often necessary to keep the warehouses open urtil far into the night in order to keep pace with the demands made upon them.

The second series of excursions for merchants members of the association from Trunk Line territory will begin to-day. September 16, and will common until September 14, inclusive. This territory includes everything ourside of a radius of one hundred miles from New-York, extending from the New-England boundary line and the seasonat as far west as on a line from Buffalo, Pittsburg, Wheeling and Parkersburg, West Va. meluding those office and the intermediate towns and effect on that line and extending south as far as on a line with line all that portion of Cannda which is east of that line and extending south as far as on a line with the Ohio River, and down to and meluding Baltimore and Washington. The first series of excursions in tills territory was rua from September 1 to 4, inclusive, and people who came to New-York between those dates are still viciting the rooms of the Merchants' Association, sixting the rooms of the Merchants' Association, sixting the rooms of the Merchants' Association, sixting the registers and complying with the conditions necessary to complete their identification.

HIGHER WAGES IN BIRMINGHAM. WORKINGMEN TO BE BENEFITED BY THE RE-VIVAL IN THE IRON TRADE.

Birmingham, Ala., Sept. 3 (Special). There is a cheefful feeling among workingmen in the Efrming-ham district on account of the prospect of an im-mediate galvance in wages, the first they have had since 182. The Alabama furnace operators have advanced from 50 cents in the last ten days, the last 25 cents advance being made yesterda brings No. 1 foundry to \$1.75 a ton at the furnace. Another 25 cents advance seems imminent, and the miners will be entitled, according to the terms of miners will be entitled, according to the terms of their contract with the operators to an advance of 25s cents. The ironmissiers report a more active demand for Southern iron among Enstern con-sumers than has been the case for several years. The business the last few days has been phenom-enal. The rolling mail grades are low it slock and great in demand on account of the improvement in the prices of finished iron. In fact, the operators say the marker could stand still another rise. Two hundred Fittsburg puddlers arrived in the city to-day.
